### HuskyTech at SCSU Main Street

We are looking forward to SCSU's annual [Main Street](#) event on September 4th from 10:00am-3:00pm!

Please stop by and encourage your students to visit our HuskyTech booth during the event to learn about all the technology services available to our campus community, including back-to-school specials through [our store](#).

---

### Technology for Teaching and Learning at T4TL

Join us at the Technology for Teaching and Learning (T4TL) showcase on Thursday, September 12<sup>th</sup>, from 1:00pm-3:00pm to learn more about teaching and learning technologies at SCSU, such as:

- Accessibility and captioning
- D2L and course integration
- Office 365
- Online course design
- Quality Matters and Online Learning Consortium (OLC)
- Visualization Lab
- Zoom web conferencing

For more information, see the [Center for Excellence in Teaching and Learning](#).

---

### IT Project and Support Software

ITS is evaluating new software systems capable of unifying all IT requests including technical support, project requests and a knowledgebase. A single service will offer many campus benefits including enhanced insight and analytics for the entire project portfolio and a more seamless user experience.

Additionally, we capitalized on the opportunity to identify new software that could offer additional functionality at a lower cost. We expect a recommendation and purchase of new software in fall semester, and will share updates as we reach major milestones.

---

## IT Security Tip

Consider [Microsoft's OneDrive](#) to securely store and access data.

Removable drives, such as USB/thumb drives, pose a severe security risk to networks and data because hackers can use removable drives to transit malware, such as viruses, and steal sensitive information. Also, removable drives are easily lost or stolen, which can lead to data loss and theft. If you find an unknown removable device, turn it in to Public Safety or HuskyTech.

---

## Did You Know?

The new web conferencing solution, Zoom, can save your recordings directly to [Minnesota State's MediaSpace](#) by clicking "Record to the Cloud" when you host a meeting.

For more Zoom information, see the [Guide to Zoom Web Conferencing](#).

---

Contact [HuskyTech](#) for technical services, support and sales.
